

# MTS Venue Music Systems

If you want your venue to be playing the right music at the right time we can cater for all your music needs. Our music system caters for audio, video, and karaoke music as well as in house advertising.

Welcome to **Music Touch Systems** ...  
'all-in-one' digital music systems, a total entertainment system.

We supply music systems for bars, hotels, restaurants, clubs and have been operating in the hospitality industry for over 20 years. Whether it be our coin-operated jukeboxes, function hire, karaoke nights, background music, our 'state of the art' **Music Touch Systems (MTS)** can cater for all your music needs.

If you don't want your customers to choose the music from a coin-operated jukebox and you want total control of what song is playing and when, then our 'behind-the-bar' computer music system is for you. Our advanced music software allows you to play your own saved music play lists or random music themes to create the right atmosphere for your venue with your audio, video and karaoke music.

Album Screen

Our **MTS Music Touch Systems** - is a 'behind-the-bar' *touchscreen* computer music system that offers a very user friendly method of choosing a song - searching by category, album, artist or song title. Simply touch the song you want, no gaps between songs and an exceptional 'admin' system ... it couldn't be easier. On-screen advertising, personalised logos, creating your own playlists, random play function, free play, optional video clips and karaoke. It truly is an all-in-one entertainment system.

**All Music Touch Systems jukeboxes come with a 12 month Warranty. Rental/Lease and Purchase options are available.**

Play List Screen

With our music partners **Visual Sounds** and **Karaoke Gold**, we can offer an endless amount of licensed music options, in video, audio and karaoke format. Service and support is available from **Melbourne Jukebox Co.** and **MTS (New Zealand)**.

- Touchscreen technology, no buttons.
- Allows continuous programming, even while playing.
- Allows you to view the tracks by the decade in which they were a hit.
  - Displays the name of songs in their play order.
  - Displays songs under CD covers as well as list screen.
    - 19" LCD Touchscreen & Computer included.
    - Search facility to find your favourite music instantly.
- Allows you to cancel the song playing or pause it to allow for announcements.
  - Starts the next song without delay, no gaps between songs.
  - On screen & TV advertising – in-house advertising.

**"... my hotel is rapt with their MTS Music System."** Awesome Amusements, Perth

**"We use the Music Touch Software for all our Party Hire Jukeboxes. Our customers love these Jukeboxes because they are totally reliable and the Touch Screen Software is so easy to use."**  
Steve Dearle - Red Hot Party Hire Pty Ltd

**"MTS software is so much better. Hotels just want reliability and the admin section is so easy to use ..."**  
Melbourne Jukebox Co.
